On June 23, 2017, the Turkish Ministry of Environment and Urbanization (MoEU) published a regulation named Kimyasalların Kaydı, Değerlendirilmesi, İzni ve Kısıtlanması Hakkında Yönetmelik (Bylaw on Registration, Evaluation, Authorization, and Restriction of Chemicals) on Official Gazette Rep. No: 30105 for the management of substances (KKDIK) that was implemented to replace three previous regulations that governed chemicals and mixtures.

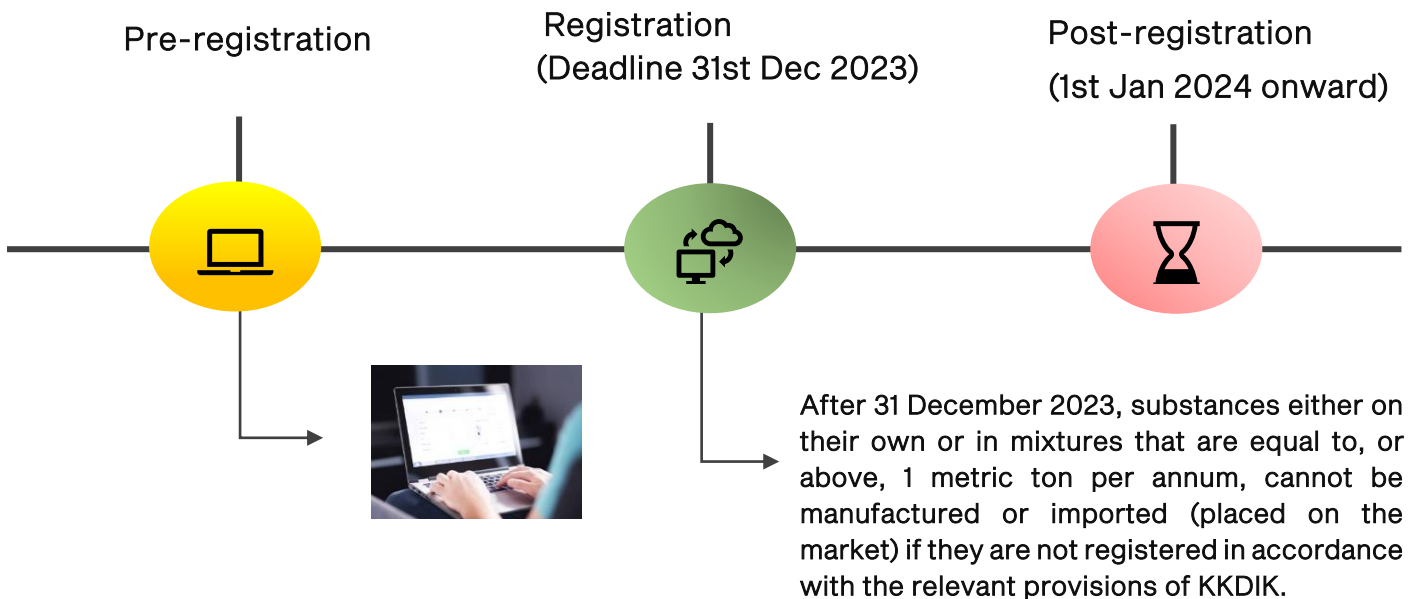

The KKDIK (also known as Turkey REACH) regulation came into effect on December 23, 2017.

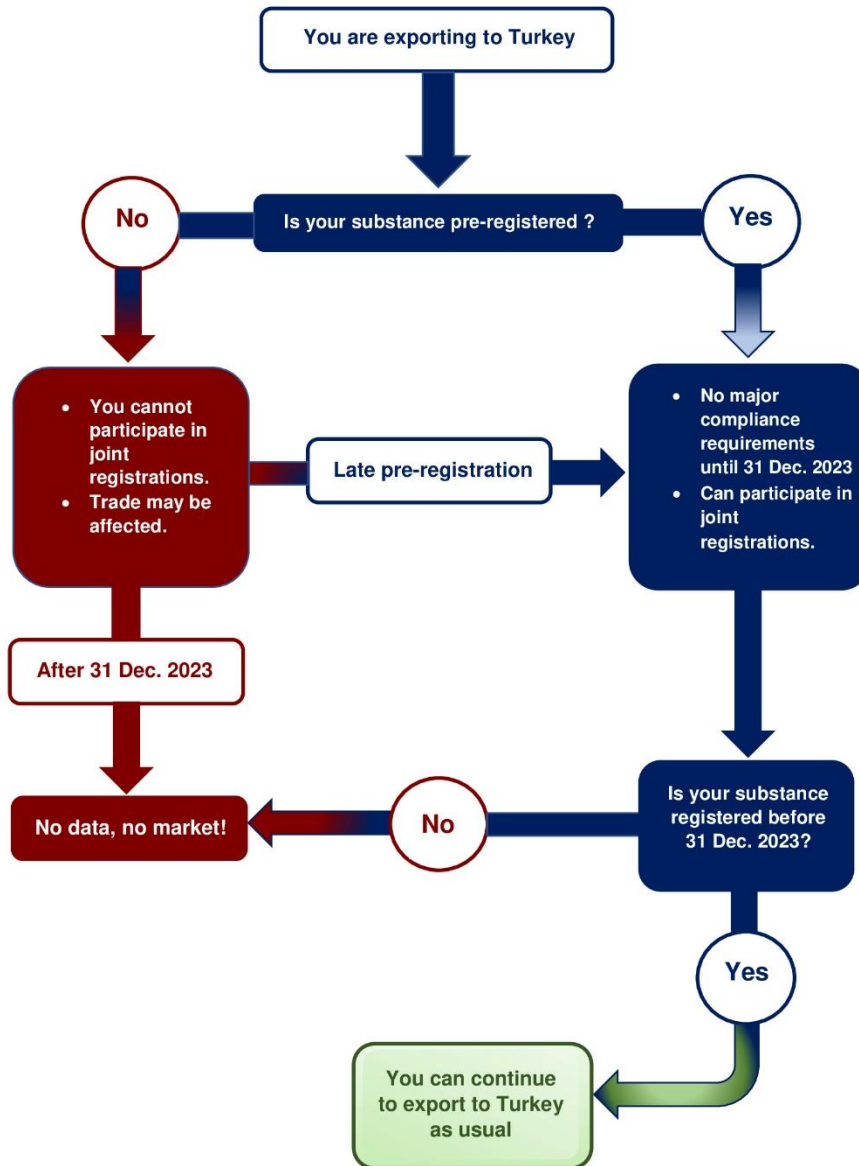

The main objective of this regulation is to manage chemical inventory, promote the secure usage of hazardous substances, ensure risk management and promoting alternatives to hazardous substances or procedures.

The regulation establishes a framework for registering, evaluating, authorizing, and restricting chemicals to safeguard human health and the environment.

By reducing animal testing and fostering innovation, the Turkish Chemical Industry's competitiveness is also expected to increase.

KKDIK TIMELINE CONSIST OF 3 MAIN PHASES

Who can register?

- ✓ Manufacturers
- ✓ Importers
- ✓ Non-Turkey manufacturers can appoint an “Only Representative (OR)” similar to EU REACH for the pre- registration and registration

As BSM Environmental Consultancy, we have authorization certificates for Chemical Registration Consultancy- KKDIK (Reach of Turkey). With our authorized and experienced team, we carry out your KKDIK processes on your behalf.
